

Dear Colleagues

On behalf of the Organizing Committees I would like to invite you to participate in the 5th Central European Biomedical Congress (CEBC) under theme

Future trends in health interventions

Plenary speakers who have already confirmed their participation:

Prof. Véronique Deroche-Gamonet PhD, HDR

Université de Bordeaux, INSERM, Neurocentre Magendie, Bordeaux, France

Prof. Gustavo Turecki PhD, MD

Douglas Hospital Research Centre, McGill Group for Suicide Studies, Montreal, Quebec, Canada

Prof. Stefan Chłopicki, PhD, MD

Jagiellonian Centre for Experimental Therapeutics (JCET), Jagiellonian University, Krakow, Poland

Prof. Johannes Kornhuber, PhD, MD

Friedrich-Alexander-Universität Erlangen-Nürnberg University Hospital, Erlangen, Germany

Prof. Kathryn A. Cunningham, PhD, MD

The University of Texas Medical Branch, Galveston, USA

Prof. Stéphane Oliet, PhD

Bordeaux Neurocampus, University de Bordeaux, France

SESSIONS:

Blood-brain barrier dysfunction in CNS disorders
Nanotheranostics and CNS disorders
Neurodegenerative and psychiatric disorders
Digital medicine - beyond diagnostics
Chaperons in Gaucher's disease
Medical biotechnology in disease modelling
Innovative nanocarriers and treatment modalities in antitumor therapy
Future therapies with psychedelics
Young scientific investigators' session

Mass spectrometry in medical sciences
Immunodiagnosics & immunotherapy
Sphingolipids in health and brain diseases
A novel approach for the treatment of the CNS pathologies
Tracking brain projections and cell signaling involved in neuroadaptations triggered
Novel rapid-acting antidepressants
Duchenne muscular dystrophy - mechanisms and possible treatments
Magnificent Seven: on the role of the 5-HT7R receptor in the brain

We hope you will join us for the Congress in Krakow or online.
