

Dear Doctoral Students,

We invite you to participate in an **anonymous** questionnaire study aimed at exploring the relationships between various factors contributing to academic success, such as a sense of purpose and the type of academic passion. The study is open to all **Polish-speaking doctoral students**.

Completing the survey will take approximately **15-20 minutes** and **may offer you an opportunity to reflect on your own academic development**. Additionally, you will be supporting young researchers who are just beginning their scientific journey.

In the spirit of academic solidarity, we kindly ask for your help in reaching out to your fellow doctoral students.
